PROJECTS

• B-LOCK: A Blockchain based e-vault application, is an application designed to securely store and manage files using Blockchain Technology with React JS as the front-end technology.

- Worked as a freelancer on a **WordPress site** built using **Elementor** for a UAE-based company that delivers POS solutions. I contributed towards the implementation of **ContactForm7** plugin integration.
- SmartStitch: A smart application for your tailoring needs, is an innovative web platform designed to streamline the process of ordering tailor-made dresses. Clients can easily provide their measurements and place orders without the need to visit a tailor in person.
- WiFi based Intelligent Parking Space, Implemented using ESP8266 WiFi Module and Blynk IoT, which manages the empty parking slots in enclosed parking spaces by directing the incoming cars to those slots.
- Animal Tracking Device, Developed using Arduino, GPS and SIM800L GSM module. Once attached to the animal's body, it sends real-time location of the animal to the owner's phone at regular intervals.

ORGANIZATIONS

• Chief Pilot Trainer at SJEC AERO, which is an aeromodelling club of St. Joseph Engineering College, established with an aim to create innovation in the field of aviation with regard to Unmanned Aerial Vehicles (RC planes and drones). SJEC AERO also takes part in various Aeromodelling competitions across India.
